Allocation of Tasks by Time Management

Total time spent: 14hours 30 minutes(approx.)

Feb 02, 2018:-

I started the final round process from 2ⁿᵈ of February. I spent one hour this day (11PM to 12am) and I gave my time to understand both the tasks case study & dataset analysis.

Feb 03, 2018:-

Second day, I spent two hours from 12 am to 2am to find out the resources to read more about the case study task in depth and about J&J vision product. So, that I could write which models are appropriate from J&J vision prospective. And, I spent time to decide the method of analysis and tool (python/R) that will be good in analyzing within this short period of time.

I spent two & half hours from 3:30 pm to 6pm in reading ieee paper & white paper at library.

 Feb 04, 2018

Third day, I spent three hours from 2:30 pm to 5:30 pm in writing case study. Parallel to this, I started data challenge and decided the model for analysis & functions to use in writing the code.

Feb 05, 2018

Fourth day, I spent my all four & half hours from 01:00am to 3:30 am and 3:00pm to 5pm in data analysis and in making final reports to submit.

Feb 06, 2018

Second day, I spent one & half hour from 12:30 pm to 2pm in finding out final errors in my submission.
